

# PICO E-Wall™

**Why Buy Parts . . .**

**When You Can Invest in a Solution?**

You wouldn't have your dispensers delivered in a box and assembled on site.

Why take the risk with your electrical system - the equipment that runs your entire site?

**The E-Wall integrates all your site's electrical needs in one solution.**

#### **Petroleum Controls**

- Gasoline dispenser products select isolation (NEC 514.13)
- Emergency stop shutdown system as required by the National Fire Protection Association (NFPA 70, NEC 514.11)
- Submersible pump controls (STP & VSP)

#### **Lighting Controls**

- Integrated lighting controls reduce electrical costs
- Multiple stage lighting controller
- Smart Breakers™ available

#### **Electrical Distribution**

- Panel boards and circuit breakers per site requirements
- Main Distribution Panel per site requirements
- QSR panels per site requirements

#### **Surge Suppression**

- Power Integrity series surge suppression is integrated in the E-Wall to reduce power disturbances to critical equipment
- Integrated parallel surge suppression is available as an option at building entrance feeders and key branch panels

#### **Generator Transfer Switch**

- Automatic or manual transfer switching available

#### **Integrated Uninterruptible Power Supply, Communications, and Monitoring Equipment**

- Backup power for POS terminals, credit card readers, site controllers, etc.
- Integrated into switchboard assembly

#### **Integrated Manufacturing**

- Complete factory assembly and wiring of all devices
- Reduces construction time
- Reduces on-site material handling
